

Fire Door Works Completion Report

PUBLIC REDACTED EXTRACT

This public extract confirms the scope completed by JJT Parsec LTD trading as Parsec Fire Doors. The client, exact property address, internal door references and location descriptions have been removed for privacy and security.

Stratford-upon-Avon	September 2026
Location	Works completed
12	20
new fire doors installed	existing doors adjusted or remediated

Statement of completed works

JJT Parsec LTD confirms that the fire door installation and remedial works summarised in this extract were carried out to the agreed scope between 1 September and 26 September 2026. The original private completion record contains the detailed door-by-door schedule and supporting documentation.

The recorded works included 12 new doors or doorsets and adjustments or remedial work to 20 existing doors. Remedial items recorded in the private schedule included combinations of lipping, hinge work and fire/smoke strip work, selected for the condition and requirements of each door.

Agreed scope and close-out

Item	Public record
New installations	12 new fire doors or doorsets installed
Existing doors	20 doors adjusted or remediated
Work control	Completed against an agreed door-by-door schedule
Supporting records	Relevant product and supplier documentation retained with the private project file
Making good	Surrounding openings and adjacent decorative finishes were excluded from Parsec Fire Doors' scope

Limitations

This extract is evidence of the recorded works only. It is not a standalone fire door inspection report, survey certificate or company-accreditation claim. Subsequent alteration, damage or work by others may affect the condition or performance of the doors.

The full private completion report is retained by the parties to the project. It is not published because it contains client information, an exact address, internal door references and detailed location descriptions.
